

# German Demolition Association presents the 21st Demolition Conference in Berlin

March 6 and 7, 2015

**Köln, 24<sup>th</sup> October 2014** / The 21<sup>st</sup> Demolition Conference will take place on 6<sup>th</sup> and 7<sup>th</sup> March 2015 in the Hotel InterContinental, Berlin. The Demolition Conference has been held in Berlin every March since 1995. Since the German Demolition Association (Deutscher Abbruchverband e.V., DA) took over this traditional event in 2011, it has become more international thanks to simultaneous translation into English and French. More than 700 visitors and 80 exhibitors took part in Europe's largest demolition convention in March 2014. The convention is open to anyone interested in the subject of demolition.

## Program and Trade Show

Visitors consist of demolition contractors, employees of engineering offices, representatives of public authorities and site managers. Approximately 20 presentations ensure a quick and varied series of current and interesting topics on the subject of demolition. The speakers are considered experts on their field. They report about the latest developments and innovations in the areas of technology, removal of toxic waste, recycling, health & safety and accident prevention. Site reports and information on relevant legal changes round the program off. The „dialogue evening“ on Friday provides all attendees an excellent opportunity to consolidate existing contacts and make new ones within an informal atmosphere.

The exhibition accompanying the convention is just as much a valuable supplement to the program as the excursions to demolition sites in Berlin on the second day. In March 2014 the exhibition consisted of about 80 booths.

## Registration

The final program of the 21<sup>st</sup> Demolition Conference will be published on the DA-website in December 2014.
