

German Demolition Association presents the 22nd Demolition Conference in Berlin

March 4 and 5, 2016

Cologne, 2nd November 2015 The 22nd Demolition Conference will take place on 4th and 5th March 2016 in the Hotel InterContinental, Berlin. The Demolition Conference has been held in Berlin every March since 1995. Since the German Demolition Association (Deutscher Abbruchverband e.V., DA) took over this traditional event in 2011, it has become more international thanks to simultaneous translation into English and French. More than 750 visitors and 90 exhibitors took part in Europe's largest demolition convention in March 2015. The convention is open to anyone interested in the subject of demolition.

Program and Trade Show

Visitors consist of demolition contractors, employees of engineering offices, representatives of public authorities and site managers. Approximately 20 presentations ensure a quick and varied series of current and interesting topics on the subject of demolition. The speakers are considered experts on their field. They report about the latest developments and innovations in the areas of technology, removal of toxic waste, recycling, health & safety and accident prevention. Site reports and information on relevant legal changes round the program off. The „dialogue evening“ on Friday provides all attendees an excellent opportunity to consolidate existing contacts and make new ones within an informal atmosphere.

The actual program will inform among others about the demolition of pre-stressed concrete bridges and demolition works within the new Birmingham railway station with a remote controlled excavator. Furthermore it contains such topics as the requirement for early involvement of Environment, Health & Safety (EHS) in dismantling projects as well as practical examples of leading German blasting companies.

The exhibition accompanying the convention is just as much a valuable supplement to the program as the excursions to demolition sites in Berlin on the second day. In March 2015 the exhibition consisted of about 90 booths.
